**Curse of
the
Bambino
still
unbroken.**

1918 to 2004

TRUTH #2

2019
The year of
information-overload

**The typical
American hears or
reads 100,000+
words every day.**

Every day, Americans take in 5X as much information as they did in 1986.

We are exposed to as much data in a single day as someone in the 15th century would be in their entire lifetime.

**The average office
worker receives 121
emails **per day.****

**“Not sure if you saw
my last email...”**

Check email or IM
40 times every day

(Once every 7.5 minutes)

**Switch between
tasks 300X a day**

**Use 56 different
apps / websites
a day**

Check phones
150 times / day

(Once every 5 minutes)

3 Ways to Break the Curse

**1st thinker
advantage**

**Get
personal**

**Be radically
transparent**

3 most important factors in shortlisting and making a final decision on an enterprise sale:

Knowledge and understanding of unique business issues

“Know my business.”

Knowledge and understanding of industry

“Know the industry.”

Fresh ideas to advance my business

“Help me win.”

[illegible]

Lead with ideas, not brute force.

Why should I change?
Where are things going?
What do you know that I don't?

First-thinker advantage.

Be first to provide value and insight in a deal.

What Matters Most to IT Infrastructure Buyers?

RELATIVE IMPACT OF EACH ELEMENT ON CUSTOMER LOYALTY*

*PERCENTAGES INDICATE HOW MUCH EACH ELEMENT CONTRIBUTED TO PREDICTING THAT A CUSTOMER WOULD BE A LOYAL PROMOTER OF THE VENDOR. THE TOTAL OF ALL 36 ELEMENTS IS 100%.

SOURCE BAIN & COMPANY

FROM "THE B2B ELEMENTS OF VALUE," BY ERIC ALMQUIST ET AL., MARCH-APRIL 2018

© HBR.ORG

How do buyers evaluate their options?

TRUTH #5

**We suck at
thought leadership.**

B2B firms fail at thought leadership:

14%

say the “thought leadership” they read is “very good” or “excellent”

03

Agility is required

Meeting evolving market demands and employee expectations requires fast, efficient adaptation.

CATALANT

What is an agile workforce?

An organization is only agile when its workforce is agile.

An agile workforce is made up of people who are reducing bureaucracy, streamlining processes, and externalizing work. It's about having the right mix of internal and external skills and talent to execute on the most important projects, with the right people working on the right projects—both aligned with the company's strategy and priorities.

Why does building an agile workforce matter to your company? The most important work in your company is cross-functional. Increasingly, it also involves both internal and external talent. But organizational silos and ingrained behaviors can stifle collaboration, obstruct opportunities, and result in waste. Business agility, to be effective, must permeate your entire workforce, not just executive leadership.

“The future of work is agile.”

“We want to be thought leaders at a level that goes well beyond what our company does.

Instead, **we commit to educate the world** on a better way to make talent happen.”

- Rob Biederman
Catalant CEO/Co-Founder

THE STATE OF COMMERCIAL REAL ESTATE OPERATIONS 2017

Original Benchmarking Research for CRE Owners and Managers by Building Engines

Efficiency Habits of High Performers

Building managers have a fiduciary responsibility to investors, and that means being diligent about controlling costs. At the same time, high-performing buildings do not sacrifice effectiveness in the name of efficiency.

RESULTS & ANALYSIS

Tenant service

Tenants are the lifeblood of a building, and nothing is more important than serving them well. Good customer service entails strong communication, adherence to service standards, and effective measurement of tenant sentiment.

Deploying an online service request system is table stakes for a commercial office or MOB property—even 90% of Laggards have one in place.

When introduced to the market, these systems were initially invaluable for their impact on staff efficiency, and later for the data they supply for reporting to executives and building owners. Today, tenants also appreciate the insight they have into service request fulfillment through modern systems. Because of their ubiquity and unique customer-facing nature, software platforms that started out as service request systems are now positioned to change the way the industry understands and manages tenant relationships.

of skills. But now the transforming workplace is adding even more complexity to the task facing property management teams. The Millennial generation became the largest portion of the workforce in 2015, bringing with it new expectations for the workplace experience.³ Occupiers continue to think about ways to reduce cost, yet they are also looking for spaces that enhance effectiveness³ and help them attract and retain talent.³ And of course technology has enabled far greater flexibility in work modes and has changed the way products are purchased and shipped. The confluence of these factors is putting additional pressure on managers from investors, brokers, and tenants to drive

How time is spent

Rapid responsiveness is inevitable in CRE, and there will always be fires to put out. Proper preparation, however, enables high-performing teams to solve problems before they escalate.

2017 State of Commercial Real Estate Operations Report Unveils Practices of High-Performing Commercial Assets

Nationwide Benchmarking Study from Building Engines Demonstrates How CRE Properties Drive Asset Value Through Operations

WALTHAM, MA (PRNewswire September 13, 2017) — Building Engines, leaders in commercial real estate (CRE) operations research, announced the release of the inaugural State of CRE 2017 report. This new research draws on a study of over 900 CRE professionals across the United States and Canada to identify best practices and benchmarks for CRE owners and managers. The research also details the perspectives about their roles and priorities.

9 Ways the Best CRE Properties Operate Differently
Establishing a link between operations and NOI is difficult. What does "best-in-class" operations look like, and how does it affect the bottom line?

by Phil Mackley

Even when capital markets are at their frothiest, commercial property values are still linked to the underlying net operating income (NOI) produced by occupancy and rental rates. It can be tempting to think of these factors as fixed, mere functions of market conditions and a property's physical features. Real estate professionals intuitively know better. But establishing a rigorous link between operations and NOI is difficult. What does "best-in-class" operations look like, and how does it affect the bottom line?

Dealing with Rising Workloads and Data Needs Through Automation

By ScriptPro
October 12, 2018

As prescription volumes continue to rise, driven by an aging population and ever-burgeoning care coverage, retail pharmacists must shoulder ever-burgeoning workloads. Compounding this are heightened expectations for front-line patient care specialists, taking on greater responsibilities within their networks. To cope with these challenges, pharmacies are increasingly turning to automation as a smart move.

Pharmacists

are expected—and want—to provide clinical and preventive care, including comprehensive patient counseling, performing medication therapy management, and conducting diagnostic screenings. It's a daunting challenge when performing prescription filling and dispensing tasks while also contributing to a more effective, holistic model of patient care.

Gaining back time with pharmacy automation

Pharmacy automation is a key element in helping retail pharmacy meet these challenges head on. Robotic dispensing and software systems that streamline workflow, pharmacy financials, and inventory, are helping to revolutionize the way pharmacists work. [Pharmacy robots](#) not only help save labor by automating the relatively mundane and repetitive tasks of filling prescriptions, they carry out their duties faster and more efficiently than their human counterparts, and with extreme accuracy. They help contain costs by increasing efficiencies – and by freeing the pharmacist to perform more high-level clinical duties.

Utilizing pharmacy data to improve the patient experience

2) What unique value
th... does?

“We were called crazy and foolish for oversharing so much about the mechanics of the business.

But we also became trusted, and, especially because the field of SEO and the broader world of tech startups are so often impenetrably secretive, **it paid off.**”

- Rand Fishkin

**Honesty
builds trust.**

An “exceptional truth:”

What everybody is *thinking*, but *nobody will say out loud*.

Say it.

An honest look at video conference calls:

zoom

Break the curse of the consideration set.

**1st thinker
advantage**

**Get
personal**

**Be radically
transparent**

Thank you!
